LNG *journal*
The World's Leading LNG publication

Narges Jodeyri
Sales Manager
E: narges@lngjournal.com

LNG journal print magazine and website is the longest standing LNG publication with a track record of quality journalism for more than twenty years. The Journal has an international distribution and covers news from the whole LNG value chain.

LNG Journal delivers 10 times a year on all the topics important to industry insiders. LNG Journal features in-depth news and market trends providing insight into crucial industry developments and offers an ideal environment for your company’s advertising.

Along with daily news updates, our regular e-publications LNG Unlimited, LNG Shipping News, LNG North America, LNG China and LNG Transition, are published as online e-newspapers on LNG Journal’s website.

These publications provide analysis and news from technology options in the engineering sector, to LNG shipping projects and financing. We track commercial developments such as tenders, contracts and new projects in shipping and the construction and planning of production plants. Trending, pricing and product specification trends are highlighted. Legal developments are tracked in the fields of supply, shipping and commercial finance and insurance.

Editorial

LNG Journal has a wide network of specialist editors who keep our subscribers up to date with in-depth news and market trends on LNG shipping, import-export terminal developments, LNG fuelling, LNG as a transition fuel and innovation technologies.

Events

The journal retains a high profile at leading industry events as we are at the forefront as an organiser of industry conferences, where a wide range of technical subjects are covered in-depth in every issue. Our webinars bring together representatives from leading industries as speakers, sponsors, media partners and delegates on a global basis.

LNG journal

The World's Leading LNG publication

48 pages essential LNG news!

September 2025

In this issue:

- 1 Europe's energy pledges: Ambition meets market limits
- 8 Middle East LNG export ambitions require over \$50 billion in CAPEX
- 13 July LNG flows surge despite weaker European demand
- 22 Interview: Navarrete discusses LNG ship repair and market outlook
- 25 LNG heavies - a cause for concern
- 26 European LNG terminals' future - challenges, transformations, and strategic integration
- 29 Supply chain optimisation poised to transform LNG fuelling sector
- 30 LNG innovation meets bunkering demand gap
- 32 A round-up of latest events, company and industry news
- 36 Tables of import and export LNG terminals and plants worldwide

Europe's energy pledge: Ambition meets market limits

The EU's ambitious new pledge to purchase \$450 billion worth of American energy annually faces significant practical obstacles from underlying market realities, our Markets Editor Joe Alexander Wills reports.

European Union leaders have agreed to dramatically increase energy imports from the United States as part of a new transatlantic trade framework. In late July 2025, President Trump and European Commission President Ursula von der Leyen announced a deal targeting \$750 billion of EU purchases of US energy over three years, primarily LNG and crude oil. Analysts criticised this pledge as "delusional", arguing that the EU cannot meet such import levels and US producers would struggle to supply such amounts. The solution promises results: a post-Trump trade deal with China that similarly overestimates practical realities.

US-EU Energy Trade

The United States has rapidly become one of Europe's most important energy suppliers since Russia's invasion of Ukraine in 2022. Following the reduction in Russian pipeline gas, Europe pressed to

US LNG under its REPowerEU strategy. By 2025, around half of all LNG imported into the EU originated from US exporters, a remarkable shift from 28 percent in 2022. According to analysis by the Institute for Energy Economics and Financial Analysis (IEEFA), the EU spent approximately \$215 billion on imported oil, coal, and LNG in 2024, of which \$60 billion, or 21 percent, was paid to US suppliers. The US contributed \$30 billion of the EU's \$44 billion LNG bill, representing 68 percent of the market. These figures underscore that US-EU energy trade is already substantial, particularly in LNG, and the new \$250 billion per year import pledge must be assessed against this backdrop.

The Pledge

An annual \$250 billion energy import target emerged from trade negotiations in late July 2025 to avert a transatlantic trade war. President Trump had threatened steep tariffs on European exports, prompting the EU into a broader second. During a meeting at Trump's golf resort in Scotland, the leaders agreed to a 15 percent US tariff on most EU goods – avoiding an even higher 30 percent tariff – alongside substantial European commitments to buy American products, particularly energy.

Energy professionals quickly dismissed the target as disconnected from market realities. Even EU officials quickly admitted that many questions remain, with Palileo observing that the second sentence "telephone under-stated financial commitments" that may not fully materialise. French officials were especially critical, with one describing the deal as "a dark day" reflecting Europe's submission under US pressure. Anna M. Jullien-Makarewicz of the IEEFA warned that the plan could even risk the bloc's energy security. The energy pledge appears to be a politically motivated

Demographics

Our subscribers and readers are made up of industry insiders, from chief executives to project engineers and shipowners. Many of the CEOs, engineers and senior executives have also contributed papers to the Journal, covering major developments and strategies across the LNG value chain from production to shipping.

Published weekly

Sponsorship opportunities

Webinar sponsorship

A bespoke, unique speaker-sponsor real-time webinar service provides attendees useful take-aways. Webinars can be used to drive lead generation and awareness and provide personal e-introductions to webinar delegate attendees. We give speaker-sponsors the right to use the recording of the webinar for your own marketing purposes.

LNG Journal webinars are marketed to all e-Newsletter subscribers.

Attendees will typically be owners and operators and C Level Executives from the global gas industry.

Moderator contact: anja@lngjournal.com

For costs contact Narges Jodeyri - Sales Manager E: narges@lngjournal.com

Other sponsorship opportunities

Magazine articles: LNG Journal publishes ten issues a year. Features researched and written by the editorial team focus on LNG pricing and trade flows, or showcase a product, technology or company expertise. External contributors are invited to submit articles to the commissioning editor for review and publication.

News articles: News articles or industry updates submitted to LNG Journal for publication.

White paper: White papers submitted to LNG Journal are hosted to provide detailed information and insight to LNG Journal readers on LNG technology.
